

Fuller & Thaler Behavioral Mid-Cap Value Fund

"The crazy thing is thinking humans always act logically."

At an individual stock level, we search for events related to **insider activity** and other news that demonstrate investor misbehavior.

- Dr. Richard Thaler

Principal, Fuller & Thaler Asset Management
2017 Nobel Prize® Winner

*The Big Short (2015)*¹

Investment Objective

U.S. mid-cap value mutual fund seeks long-term capital appreciation with similar risk levels and characteristics to its benchmark, the Russell MidCap® Value Index. Looks for companies with:

- significant insider buying or stock repurchases (over-reaction)

Invests in domestic stocks with market capitalization similar to those included in the Russell MidCap® Index at time of purchase.

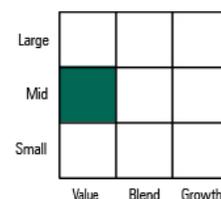

Over-reaction

...to historical, negative information

Investment Process

Using principles of behavioral finance, the Fuller & Thaler Behavioral Mid-Cap Value Fund capitalizes on the market's **over-reaction** to negative information regarding a company's future prospects and draws from its more than 20 years of experience in analyzing events that suggest investor misbehavior.

If the behaviors are present, Fuller & Thaler then proceeds to its fundamental analysis of the company. In summary, if an investor mistake is likely, and the company has solid fundamentals, the fund buys the stock.

The Behavioral Edge®

This information is provided solely for general informational purposes and does not constitute an offer to sell or a solicitation of an offer to buy or sell any product or service to any person or in any jurisdiction where such offer or solicitation would be unlawful.

Investors should carefully consider the investment objectives, risks, and charges and expenses of the fund before investing. The prospectus contains this and other information about the fund, and it should be read carefully before investing. Investors may obtain a copy of the prospectus by calling 888-912-4562.

Fuller and Thaler Asset Management is the adviser to the Fund. The Fund is distributed by Ultimus Fund Distributors, LLC. Investing involves risk, including loss of principal. There is no guarantee that this or any investment strategy will be successful. Fund returns reflect the reinvestment of any dividend and interest income. Small-cap investing involves greater risk not associated with investing in more established companies, such as greater price volatility, business risk, less liquidity and increased competitive threat.

Performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. The Fund's Adviser has agreed to contractually waive its management fee and/or reimburse expenses through January 31, 2022, so that total annual operating expenses do not exceed 1.15%, 0.90%, and 0.80% for Investor Shares, Institutional Shares and R6 shares respectively. The expense limitation does not apply to interest, taxes, brokerage fees and commissions, other extraordinary expenses not incurred in the ordinary course of the Fund's business, and indirect expenses such as acquired fund fees and expenses.

The Morningstar Rating for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar RiskAdjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Morningstar Rating as of 3/31/21: Overall: 4 stars 415 funds; Three-year rating: 4 stars, 409 funds based on risk-adjusted returns. The rating is for the Institutional Share Class (FTVSX) only. Performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. The Fund's Adviser has agreed to contractually waive its management fee and/or reimburse expenses through January 31, 2022, so that total annual operating expenses do not exceed 1.15%, 0.90%, and 0.80% for Investor Shares, Institutional Shares and R6 shares respectively.

The Fund uses the Russell Mid-Cap as its benchmark. Please read the prospectus for a more complete discussion of risk. Unless otherwise noted, index returns reflect the reinvestment of income dividends and capital gains, if any, but do not reflect fees, brokerage commissions, or other expenses of investing. It is not possible to invest directly in the index.
